

# Sponsorship logo file specifications

Best filetypes: .ai or .eps ("vector" files)

If you don't have a vector file of your logo:

.pdf .jpg .tiff .png can also be used as long as the image is high resolution.  
(minimum 150dpi at 5" wide) Smaller/ lower resolution images may appear 'fuzzy' and text may be hard to read when printed.

The larger the file, the better! See examples below.

If you're not sure if the file(s) you have will work, send over what you have and we can take a look at them.

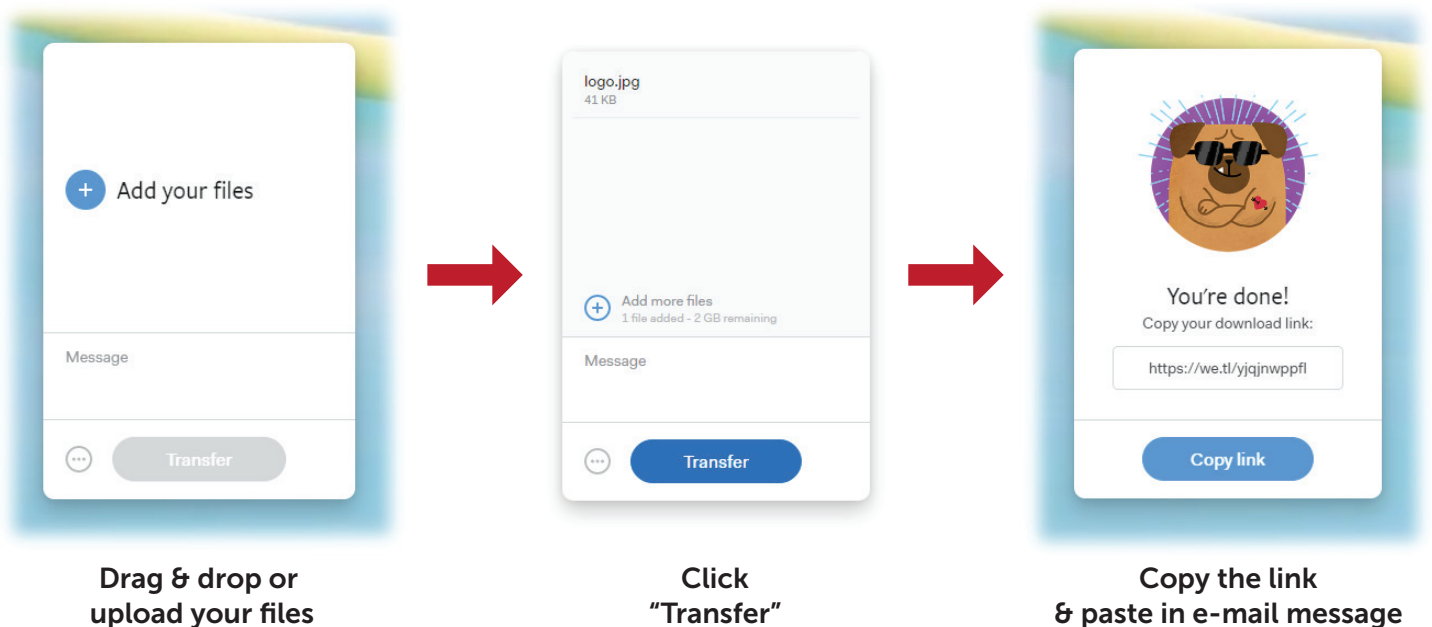

low resolution image  
(will look fuzzy when printed)

vector/ high resolution image  
(will look crisp and clean when printed)

Are your files too large to attach in an e-mail?  
Use [www.wetransfer.com](http://www.wetransfer.com)!

When we receive your e-mail, we can download the files from the wetransfer link.
